

## **USED PCS**

**([www.re-compute.com](http://www.re-compute.com))**

If the bargain-basement prices for new personal computers are still too much for you, check out a Web site called Re-compute.

It sells used, brand-name PCs for as little as \$279.

The site offers refurbished desktops, minitowers and workstations from companies such as AST, Compaq, Dell, HP and IBM. The PCs come with a 1-year warranty.
